

NEVISCURA BED SENSOR - THE SMART ANSWER TO ANNOYING SENSOR MATS

The bed sensor from nevisCura is an intelligent bed exit alarm that makes everyday work noticeably easier for caregivers. Once attached to the bed in just a few simple steps, the silent guard discreetly signals when a resident wants to leave the bed - even before he has set foot on the floor. And best of all, the sensor is compatible with any standard nurse call system.

Less false alarms

The intelligent technology reduces false alarms to a minimum.

Flexible alarm connection

Suitable for telephone systems, home emergency call, light call system or radio gong.

Quick installation

Simply hook it to the bed, connect it to the nurse call system and the device is ready to use.

High investment connection

Through regular updates, the device always receives new functions and can thus be used for a long time.

”

The nevisCura bed sensor ensures greater safety for our residents. It inconspicuously prevents falls and provides technically useful support for the work of our staff.
